#### CUSTOMER SERVICE

Speed of Service	Typically 8 working days
SCN	202005155009230083
Order Date	May 15, 2020

Should you require any further information or have any questions, please contact your local Customer Service Centre.

Enquiries should always contain the below minimum details:

- Full company name and address
- Contact name and number
- SCN
- Order Date

The information in this report was last updated on Jul 30, 2019

#### **D&B RATING GLOSSARY**

## D&B Rating - The D&B rating consists of two parts, the Financial Strength Indicator and the Risk Indicator.

For example: in the case of a 2A 4 rating, 2A means the financial strength of the business and the 4 is the risk indicator.

The **Risk Indicator** is used in conjunction with the Financial Strength Indicator. The Risk Indicator reflects D&B's opinion of a company's health, stability and overall condition. It takes into consideration all significant elements of credit. Such classification is relative and is predicted on the broad and overall view point. Created from expert rules systems, the Risk Indicator is refreshed whenever data is loaded onto our databases. Please see the table below for the Risk Indicators and their corresponding values.

V

Risk Indicators			
4	Significant level of risk	Take suitable assurances before extending credit	Assigned to concerns of known financial weakness. A number of years losses, higher than normal working capital deficit, a negative tangible net worth which is the worsening, court judgements, bad payments etc. This risk is associated with being a creditor of these concerns is high or significant
3	Greater than average risk	Proceed with transaction but monitor closely	Assigned to concerns believed to be financially sound but with a history of slow payments or some losses or working capital deficit. The risk associated with being a creditor of these concerns is higher and would be classified as potentially slow payers or fair trade risk
2	Low risk	Proceed with transaction	This is assigned to financially sound concerns, having no known record of bad payments and paying suppliers quickly.The risk associated with being a creditor of these concerns would be low and they would be classified as ordinary trade risk
1	Minimal risk	Proceed with transaction - offer terms required	Assigned to companies of undoubted credit standing and financially strength.The risk associated with being a creditor of these concerns would be negligible or zero, the concern which pays bills promptly or discount.
-	Insufficient information to assign a risk indicator	No public information or D&B proprietary information available to indicate trading activity	Assigned to concerns where there is insufficient information to express any opinion on the condition, financial soundness or payment history of the concern.A concern with no telephone number will also be assigned a "-" condition

# FINANCIAL STRENGTH INDICATOR

The Financial Strength Indicator is based on either the Net Worth or Issued Capital. The table below contains the possible values.

Financial Strength Indicator		Range	
Net Worth	Capital	From	То
5A	5AA	\$60 million	And above
4A	4AA	\$25 million	\$60 million
ЗА	3AA	\$12 million	\$25 million
2A	2AA	\$2.5 million	\$12 million
1A	1AA	\$1.2 million	\$2.5 million
А	AA	\$600,000	\$1.2 million
В	BB	\$345,000	\$600,000
С	СС	\$175,000	\$345,000
D	DD	\$120,000	\$175,000
E	EE	\$60,000	\$120,000
F	FF	\$35,000	\$60,000
G	GG	\$15,000	\$35,000
Н	НН	0	\$15,000

Alternative Ratings Used	
Ν	Financial Strength is negative
0	Financial Strength is undisclosed
NB	New Business: less than 24 months
NQ	Out of Business: Business has ceased to trade

## FINANCIAL RATING GLOSSARY

Name	Formula	Explanation
Current Ratio (x)	Total Current Assets / Total Current Liabilities	This ratio shows the cover by current assets or short term creditors, and the higher the ratio the more assurance there is that payment of creditors can be met
Solvency Ratio (%)	((Total Current + Deferred + Long Term Liabilities) / Tangible Net Worth) x 100	From this can be seen the extent to which the company is financed by creditors and debt rather than permanent finance. The higher the ratio the more likely it is that the debt (either short term or long term) will be a burden to the company. The effect is higher interest changes, lower profits and a squeeze on liquidity to the disadvantage of creditors.
Fixed Assets to Net Worth (%)	(Total Fixed Assets / Tangible Net Worth) x 100	The proportion of net worth that consists of fixed assets will vary greatly from industry to industry, but in general terms a company is under capitalised if fixed assets exceed net worth. In this case it is possible that the company has too much debt, and it should therefore be examined with care. If on the other hand fixed assets are much lower than net worth the company is over capitalised and is either extremely cautious o in a position to expand. Thus a ratio either well in excess of the median, or well below it, means that the company should be looked at with care.
Current Liabilities to Net Worth (%)	(Total Current Liabilities / Tangible Net Worth) x 100	This contrasts the funds that creditors are temporarily risking with a company with the funds permanently invested by the owners. The higher the ratio the less security for creditors. Care should be exercised when selling to any company with creditors of less than one year exceeding two thirds of net worth
Asset Turnover (%)	(Turnover / Total Assets(including intangibles)) x 100	This ratio measures how efficiently the company's management has been in generating sales from the assets at its disposal. The measure can vary considerably from industry to industry and should therefore be judged according to the industry norm.
Sales to net working capital (x)	Turnover / Net working capital	This ratio indicates whether a company is over trading (handing an excessive volume of sale in relation to working capital). Companies wit substantial sales gains often reach a level where their working capital becomes strained Even if they maintain an adequate total investment for the volume being generated (assets to sales) that investment may be so centred in fixed assets or other non-current items that it will be difficult to continue meeting all current obligations. A ratio falling into either an extremely high or low position may indicate potential problems.
