Projections
Financial performance of the company for the current fiscal year from 1/1/2012 to $12 / 31 / 2012$ was projected as follows:-

AMOUNT
(Thousands)
Sales

$$
4,000,000
$$

## Financial Analysis

Sales was on an uptrend, increasing to \$3,079,351 thousands in 2013 from \$2,865,403 thousands in 2012.

Current ratio of 1.83 indicated a negative working capital position with short-term liabilities in excess of current assets.

Debt/equity ratio at 0.85 indicated that the company had financed its operations primarily with external sources of funds, but was not excessive.
Operations were very profitably with a net margin of $4.77 \%$.
The net profit (after tax) of 196,977 thousands represented an attractive 10.16\% return on equity and a $4.09 \%$ return on total assets.

## Suits

A search conducted in all courts including 1 Supreme Court， 6 High Courts， 20 District Courts， 29 Small Claims Tribunals and 5 Administrative Courts within Taiwan and Fu Chien reveals no court judgment been formed against the subject．

## Bidding Right Suspension

A search conducted at the Taiwan Governmental Authorities revealed the subject is not prohibited from bidding against Governmental projects currently．

## Taiwan Financial Stress Model

The Financial Stress model assigns three measurements of risk:

1. A "Class" of $\mathbf{1}-\mathbf{5}$, which is a segmentation of the scoreable universe into five distinct risk groups where a one (1) represents businesses that have the lowest probability of financial stress, and a five (5) represents businesses with the highest probability of financial stress. This Class enables a customer to quickly segment their new and existing accounts into various risk segments to determine appropriate marketing or credit policies.
2. A "Percentile" of $\mathbf{1 - 1 0 0}$, where a 1 represents businesses that have the highest probability of financial stress, and a 100 which represents businesses with the lowest probability of financial stress. This Percentile shows you where a company falls among businesses in the D\&B database, and is most effectively used by customers to rank order their portfolios from highest to lowest risk of business failure.
3. A "Financial Stress Score" of 1,232-1,600, where a 1,232 represents businesses that have the highest probability of financial stress, and a 1,600 which represents businesses with the lowest probability of financial stress. As this score is derived directly from the scorecard, it offers a more precise measure of the level of risk than any other measurements of risk as it shows the exact score from the scoring algorithm. The D\&B

Financial Stress Score is especially useful to customers using computerized decision systems to determine overall business performance.

| Export/Import Value Range Table |  |
| :---: | :---: |
| A | 10 USD million \& up |
| B | $9 \sim 10$ USD million |
| C | $8 \sim 9$ USD million |
| D | $7 \sim 8$ USD million |
| E | $6 \sim 7$ USD million |
| F | $5 \sim 6$ USD million |
| G | $4 \sim 5$ USD million |
| H | $3 \sim 4$ USD million |
| I | $2 \sim 3$ USD million |
| J | $1 \sim 2$ USD million |
| K | $0.5 \sim 1$ USD million |
| L | $0 \sim 0.5$ USD million |
| M | 0 |
